

The Challenge

Gateway Public Schools in San Francisco is committed to equipping new teachers with the tools they need to succeed. Initially, they implemented Google Classroom for their Induction Program, hoping it would provide structured support. However, it fell short in reflective learning, collaboration, and mentorship—essential elements for teacher growth. Frustration grew as new educators struggled to receive meaningful feedback, leading Gateway to seek a more effective solution.

The Solution: Sibme's Transformational Impact

Recognizing the need for a dynamic and interactive platform, Gateway adopted Sibme, which provided video coaching, real-time feedback, and collaborative learning communities. With Sibme, teachers gained structured reflection opportunities, improved mentorship, and personalized professional development.

Key Benefits of Sibme at Gateway

- **Video Observation & Reflection:** Teachers recorded, reviewed, and refined their instructional methods, fostering self-improvement.
- **Collaborative Learning Communities:** The platform created a network of mentorship, where new teachers engaged in discussions, shared insights, and received constructive feedback.
- **Personalized Coaching & Development:** Educators benefited from structured, individualized support, accelerating their growth and confidence in the classroom.

The Results

By implementing Sibme, Gateway transformed its induction process into an engaging, structured, and supportive experience. Teachers felt more prepared, mentorship became more impactful, and collaboration increased significantly. With deeper reflection and stronger feedback, new educators were better equipped to succeed in their teaching careers.

"Google Classroom didn't provide the depth of support we needed—Sibme changed everything."

Donna Scarlett - Induction Coordinator at Gateway Public Schools

"Video reflection helped me see my teaching from a new perspective. I improved faster than ever before."

New Teacher at Gateway Public Schools

"Sibme's mentorship features built a sense of community that Google Classroom never could."
